

prohibition in 49 CFR 391.41(b)(8) to operate a CMV in interstate commerce and requested comments from the public (87 FR 39889). The public comment period ended on August 4, 2022, and no comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(8).

The physical qualification standard for drivers regarding epilepsy found in § 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria¹ to assist medical examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

SUPPLEMENTARY INFORMATION:

Title: National Census of Ferry Operators (NCFO).

Background: The Transportation Equity Act for the 21st Century (TEA–21) (Pub. L. 105–178), section 1207(c), directed the Secretary of Transportation to conduct a study of ferry transportation in the United States and its possessions. In 2000, the Federal Highway Administration (FHWA) Office of Intermodal and Statewide Planning conducted a survey of approximately 250 ferry operators to identify: (1) existing ferry operations including the location and routes served; (2) source and amount, if any, of funds derived from Federal, State, or local governments supporting ferry construction or operations; (3) potential domestic ferry routes in the United States and its possessions and to develop information on those routes; and (4) potential for use of high speed ferry services and alternative-fueled ferry services. The Safe, Accountable, Flexible Efficient Transportation Equity Act—A Legacy for Users (SAFETEA–LU) Public Law 109–59, section 1801(e) required that the Secretary, acting through the BTS, shall establish and maintain a national ferry database containing current information regarding routes, vessels, passengers and vehicles carried, funding sources and such other information as the Secretary considers useful. MAP–21 legislation [Moving Ahead for Progress in the 21st Century Act (Pub. L. 112–141),] continued the BTS mandate to conduct the NCFO and also required that the Federal Highway Administration (FHWA) use the NCFO

data to set the specific formula for allocating federal ferry funds. The funding allocations were based on a percentage of the number of passenger boardings, vehicle boardings, and route miles served.

BTS conducted the first Census of Ferry Operators in 2006, and again in 2008, 2010, 2014, 2016, 2018, 2020, and plans are underway for the conduct of the next NCFO in the Spring of 2023. The 2022 NCFO was delayed by one year since ferry operations were disrupted by the pandemic and the census data should collect typical data. These information collections were originally approved by OMB under Control Number 2139–0009.

The recently enacted FAST Act legislation [Fixing America's Surface Transportation Act (Pub. L. 114–94, sec. 1112)] continues the BTS mandate to conduct the NCFO on a biennial basis, and extended the requirement that the Federal Highway Administration (FHWA) use the NCFO data to set the specific formula for allocating federal ferry funds based on a percentage of the number of passenger boardings, vehicle boardings, and route miles served. The overall length of the revised questionnaire for the 2022 NCFO will remain consistent with that of previous years.

The census will be administered to the entire population of ferry operators (estimate of 250 or less). The census will request the respondents to provide information such as: the points served; the type of ownership; the number of passengers and vehicles carried in the past 12 months; vessel descriptions (including type of fuel), federal, state and local funding sources, and intermodal connectivity. All data collected in 2022 will be added to the existing NCFO database.

Respondents: The target population for the census will be all of the approximately 250 ferry operators existing in the United States.

Estimated Average Burden per Response: The burden per respondent is estimated to be an average of 30 minutes. This average is based on an estimate of 20 minutes to answer new questions and an additional 10 minutes to review (and revise as needed) previously submitted data that will be pre-populated for each ferry operation.

Estimated Total Annual Burden: The total annual burden (in the year that the census is conducted) is estimated to be just under 125 hours (that is 30 minutes per respondent for 250 respondents equals 7,500 minutes).

Frequency: This census will be updated every other year.

Public Comments Invited: Interested parties are invited to send comments regarding any aspect of this information collection, including, but not limited to: (1) the necessity and utility of the information collection for the proper performance of the functions of the DOT; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, clarity and content of the collected information; and (4) ways to minimize the collection burden without reducing the quality of the collected information. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Authority: The Transportation Equity Act for the 21st Century, Pub. L. 105–178, section 1207(c), The Safe, Accountable, Flexible Efficient Transportation Equity Act—A Legacy for Users (SAFETEA–LU), Pub. L. 109–59, Moving Ahead for Progress in the 21st Century Act (MAP–21), Pub. L. 112–141, 49 CFR 1.46, and Fixing America's Surface Transportation Act (FAST Act), Pub. L. 114–94, sec. 1112.

Issued in Washington, DC, on the 29th of August 2022.

Cha-Chi Fan,

Director, Office of Data Development and Standards, Bureau of Transportation Statistics, Office of the Assistant Secretary for Research and Technology.
