Introduction

PowerDesigners, LLC is a high tech company offering a complete line of **Battery Management Solutions**. The company is the first to offer a complete line of battery management products consisting of intelligent and fast battery chargers, monitors, cyclers, and equalizers serving the industrial battery market.

What's New?

Power Integrations has introduced *PeakSwitch*™, the industry's first family of ICs for power supplies with peak-to-continuous power ratios of up to 3:1.

PeakSwitch is ideally suited for power supplies in applications such as printers, personal video recorders (PVRs), audio amplifiers, broadband modems and DC motor drives.

NUCLEAR AND MEDICAL APPLICATIONS

Power-One products are not designed, intended for use in, or authorized for use as critical components in life support systems, equipment used in hazardous environments, or nuclear control systems without the express written consent of the respective divisional president of Power-One, Inc.

TECHNICAL REVISIONS

The appearance of products, including safety agency certifications pictured on labels, may change depending on the date manufactured. Specifications are subject to change without notice.

Welcome to PowerStream

PowerStream is a Lund Instrument Engineering, Inc. Company.

Lasting Relationships are the ones that pay off.

PowerStream Technology is in the business of helping other companies develop products. Our engineers have many years of experience in a wide variety of fields. They have developed products from laser range finders to security switches. We now concentrate on helping other companies engineer their power needs--batteries, power supplies and dc to dc converters.

After all, it makes sense for you to concentrate on your special expertise and let us concentrate on ours.

We also carry many off-the-shelf products to help you quickly develop products. We specialize in custom, semi custom, and off-the-shelf power supplies, battery chargers, UPS and battery backups.

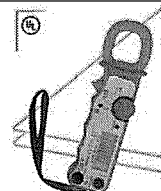

We not only engineer products, but we also manufacture products both in Utah and in China. This helps our customers and keeps us in lasting, long term relationships with both our customers and our factories.

New: Sale for B&B Sealed Lead Acid Batteries is still in progress!

BP4.5-12RT

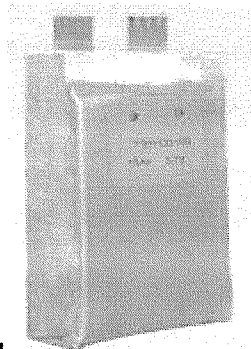

New: Inexpensive Clamp-on DC

Ammeters

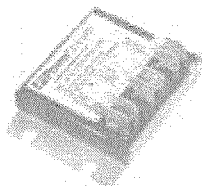

New: Ultra large lithium polymer cells and battery packs with safety boards and chargers!

Our products are cost effective, environmentally safe and custom designed to your specifications. We pride ourselves in being easy to work with, and in developing custom products VERY QUICKLY.

chargers!

All through our company history, customers have chosen PowerStream because of our innovative technology, manufacturing excellence, quick response time and flexibility.

New: DC UPS module for Cars.

Battery Chargers

PowerStream

Specializing in the custom design and manufacturing of switching power supplies and intelligent battery chargers for OEMs in a hurry.

NiMH and NiCad Charger Index

A wide variety of chargers for packs and single cells.

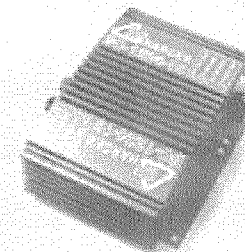

Battery Back Up for Cars

This module charges an external battery and acts like a DC UPS to keep equipment running in a vehicle even when the vehicle power fails.

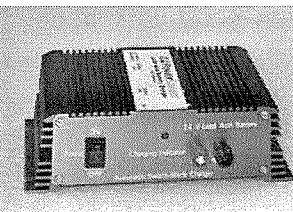

DC Input Lead Acid Battery Chargers

These charge sealed lead acid, SLA, gel cell, and VRLA, or even flooded lead acid batteries from 12 volt or 24 volt cars, batteries, fork lifts, etc.

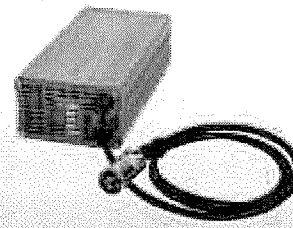

12 and 24 volt lead acid and SLA chargers

PowerStream has added a line of standard chargers for the electric mobility market. These chargers charge sealed lead acid batteries at high rates. They feature advanced charge algorithms for long battery life as well as fast charge. They use switching power supplies, which makes the charger smaller and lighter than conventional supplies.

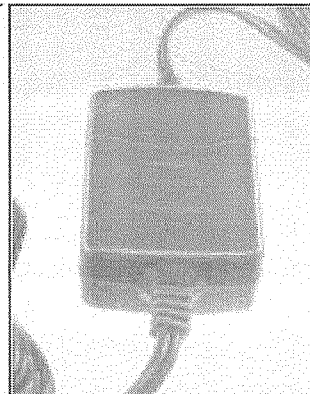

Medical use Sealed Lead acid Chargers

IEC60601 chargers for 24 volt batteries 4, 6, and 8 amps output.

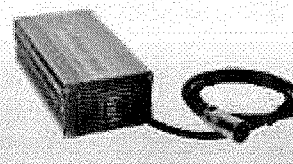

Bicycle and Scooter Ultralight Chargers

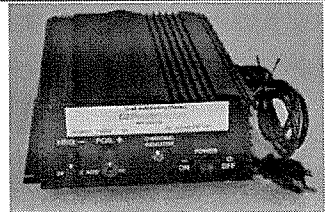

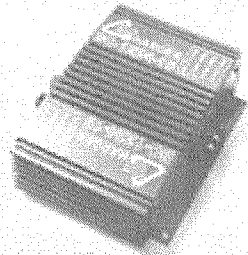

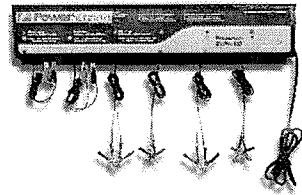

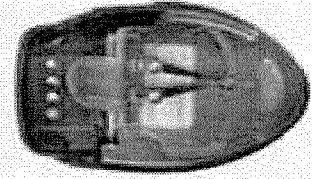

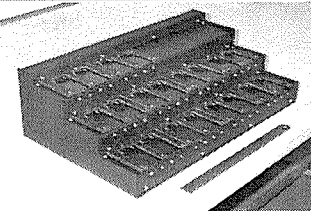

These switching chargers are very small and light, and are designed for overnight charge. These are perfect as the charger that ships with the original bicycle, since they are small, inexpensive, and reduce shipping costs.

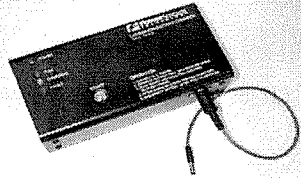

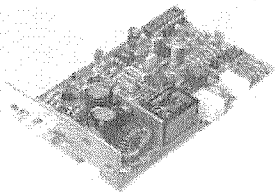

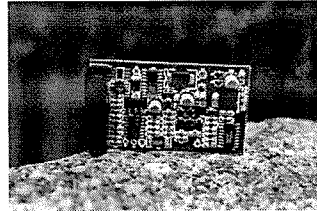

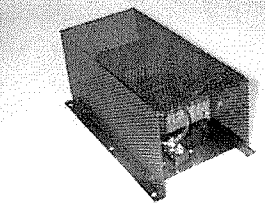

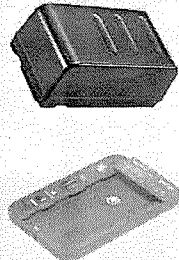

36 Volt Lead Acid Battery Chargers

36 volt switchmode chargers are suitable for lead acid, sealed lead acid, VRLA, and gel cell batteries.

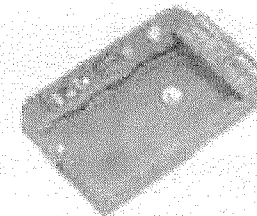

<u>High Power Lead Acid Chargers</u>	12V, 24V, 36V and 48V chargers for lead acid, sealed lead acid, valve regulated lead acid batteries where high currents are required.	
<u>Wheel Chair in-Car Chargers</u>	<u>High power 4-stage intelligent chargers for charging wheelchairs and scooters in your van or car.</u>	
<u>Multibay Chargers</u>	We make multibay chargers for Lead Acid, NiMH, NiCad, and Lithium Ion batteries.	
<u>Lithium Ion Coin Cell chargers</u>	This off-the-shelf wall mount charger will charge the complete line of PowerStream lithium-ion coin cells	
<u>PV System Charge Controllers</u>	12 volt solar charge controllers for charging lead acid batteries with solar panels	
<u>Custom Chargers</u>	Our expertise covers various battery types including NiCad, NiMH, Lithium Ion, Nickel Zinc and Lead Acid batteries. This section discusses charging of the different battery chemistries.	

<u>Lithium-Ion Battery Chargers</u>	These microprocessor controlled unit for charging a 3 cell packs and 4 cell lithium-ion and lithium polymer battery packs.	
<u>Remote Charging Boards</u>	These microprocessor controlled board charge a 12 volt lead acid battery from a low voltage DC input that can range from 18 to 28 volts. This lets the charger be positioned at a remote battery while being powered with low voltage DC up to 1000 feet away.	
<u>Smart Battery Charging and Safety Boards</u>	These boards can communicate battery status to the system and also protect against overcharging, over discharging, over current, and over or undert temperature. Includes NiMH, NiCad and Lithium Ion protection and safety boards.	
<u>Ferroresonant Chargers</u>	For industries that need the absolute cheapest high current charger available for lead acid we have developed a quality ferroresonant charger in a metal screen frame package. This product is strictly for incorporation into original equipment.	
◆ <u>Complete Removable Battery Pack and Charger Solution for OEMs and Designers, NiMH and NiCad</u>	With this system a design engineer can include a removable battery pack in his system without paying for tooling.	

Stand-Alone Charger for
Camcorder Batteries

This Smart Charger charges
NiCad and NiMH battery packs
compatible with Sony NP Series
battery packs. AC and
Automobile power sources
included.

AC to DC Power Supplies

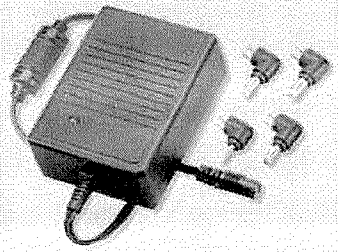

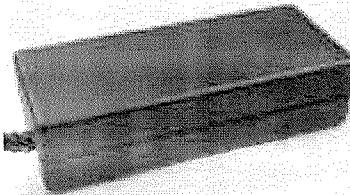

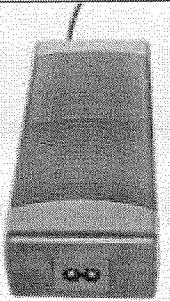

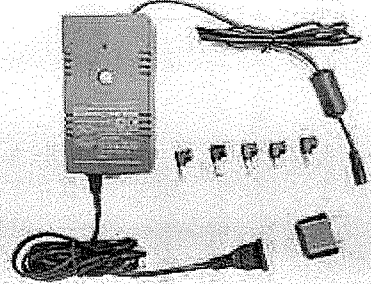

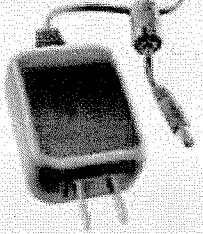

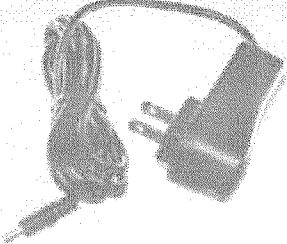

PowerStream

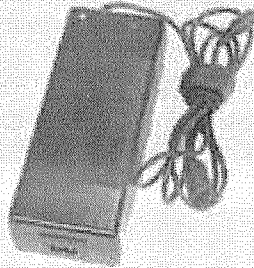

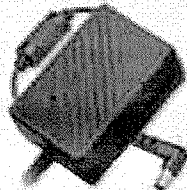

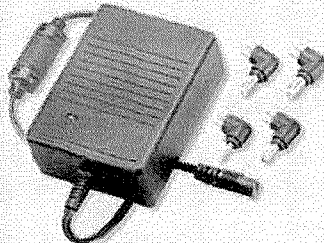

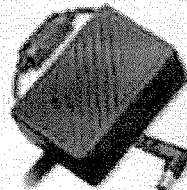

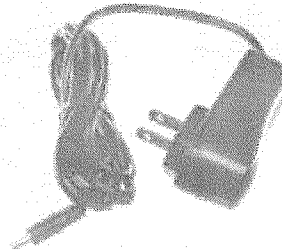

Specializing in the custom design and manufacturing of switching power supplies and intelligent battery chargers for OEMs in a hurry.

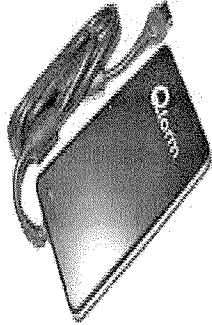

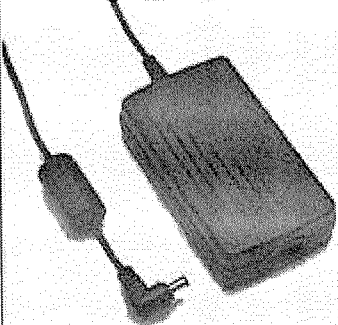

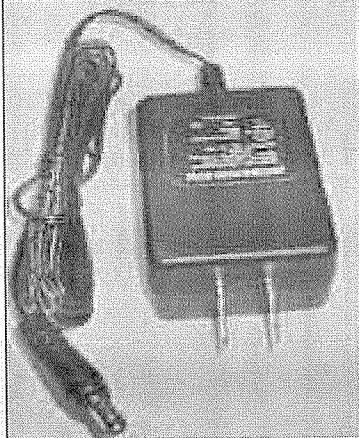

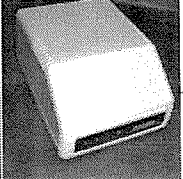

PowerStream specializes in the design and manufacture of custom power products. Many of these products have switching power supplies. We have developed a series of linear and switchmode power supply designs ranging from 1 watt to over 500 watts which we can incorporate into new power supplies. We also develop new circuits whenever needed to meet our customer's requirements. Wholesale power supplies and retail power supplies are available.

		<u>Laptop Computer Adapters</u>	AC to DC Power supplies and cords for most makes and models of laptop computers	
12V	2000 mA	<u>12 volt 2 amp medically approved power supply</u>	Small switchmode power supply with 60601 approvals, ROHS and Energy Star	
3.3 V	4000 mA	<u>3.3 Volt 4A desktop switchmode power supply</u>	3.3 volt 13.2 watt power supply in a small switchmode configuration	

3V, 3.3V, 5V, 6V, 6.5V, 7V, 8.4V	15 Watts	<u>Switchmode 15 Watt Power Supplies with adjustable output</u>	These compact DC switchmode power adapters have well regulated user-adjustable output 3, 3.3, 5, 6, 6.5, 7, and 8.4 volts PST-AC1898	
12V	4A	<u>12 Volt, 50 Watt Switching Power Supply</u>	Inexpensive 12 volt switching AC to DC power supply with 4.1 amp output, 5 amps surge, IEC input connector for universal input. PST-1245	
36V	3A	<u>36 VDC, 100 watt power supply</u>	This lightweight 100 watt power supply delivers 36 volts at 3 amps.	
12V, 15V, 16V, 18V, 19V, 20V, 21V, 22V or 24V	90 Watt	<u>90 Watt Adjustable AC/ DC Converters output 12 to 21 volts</u>	User adjustable 12 to 21 volt switchmode AC power supply, 90 watts includes 5 plug adapters and a European wall adapter PST-AC0407	

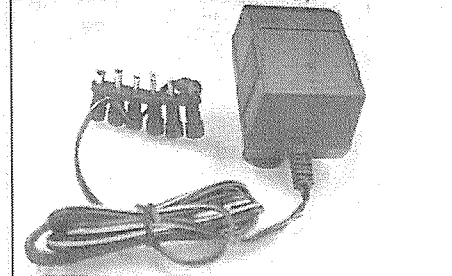

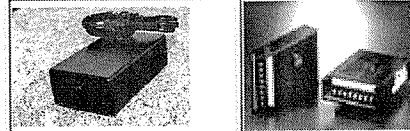

6V 12V 24V	36W and 72W	<u>Battery Backup Single Output Power Supplies</u>	Available in <u>6 volts, 12 volts, and 24 volts output</u> . Universal switchmode AC power supply 35 to 70 watts. DIN mount with screw terminal input and output. PST-SP12	
9V	1.3 A	<u>9 VDC 12 Watt Switching Power Supplies</u>	Miniature wall mount 9 volt 1.3 Amp power supply	
5V	0.5A	<u>Switchmode 5 Volt 0.5A wall mount power supply</u>	This 5V 500 mA watt power supply is in a slimline wall mount package	
5V	2 A	<u>Switching 10 Watt, 5 VDC Power Supplies</u>	Fixed 5.0 volts output, 2000 mA tiny desktop AC/DC converter with universal input. PST-AC-0520	

15V	8 A	<u>Switchmode 15 Volt, 8 Amp, 120 Watt Power Supply</u>	15 volt fixed output power supplies with two prong IEC AC connector and 5.5mm x 2.1mm barrel connector PST-AC-1580	
12V	2.5A	<u>Switching 40 Watt, 12 VDC Power Supplies</u>	Wall-mount Regulated 12VDC at up to 2500 mA, with folding AC prongs PST-AC1225	
		<u>Switchmode PowerAdapter for Digital Cameras</u>	This adjustable wall-mount power adapter fits over 90 different digital cameras. PST-1898	
9V	1.8A	<u>9 VDC 16 Watt Switching Power Supplies</u>	Wall-mount Regulated 9VDC at up to 1800 mA, with folding AC prongs PST-AC2809	
24V	500 mA	<u>24 Volt 0.5A wall mount switchmode power supply</u>	This 12 watt power supply is in a slimline wall mount package	

12V	18A	<u>12 V, 220 watt power supply for LED panels, LED signs, mini PCs</u>	Regulated switchmode 18 amp 12 volt power supply.	
		<u>Switching 18 to 120 Watt Power Supplies</u>	Desktop switching power supplies from 18 to 120 watts in voltages from 3.3 to 24 VDC, includes Laptop Adapters.	
		<u>Switching 15 Watt Power Supplies</u>	Wall mount power supplies from 4 to 24 volt. Switchmode technology makes them ultralight and efficient	
		<u>Custom Power Supplies</u>	This includes AC/DC supplies, DC/DC converters, wall mount supplies, and desktop supplies	 

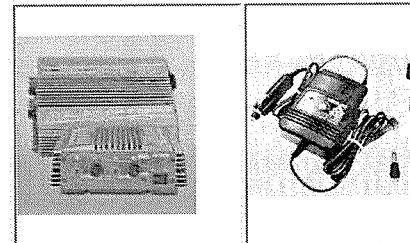

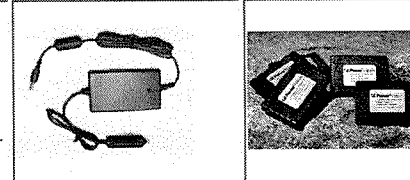

Standard Wall
Mount Adapters

Lightweight regulated switching adapters, or inexpensive transformer based adapters from PowerStream.

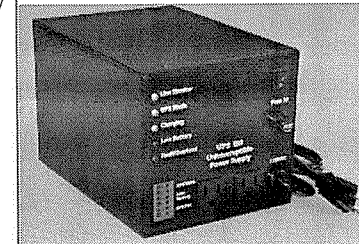

DC/DC
Converters

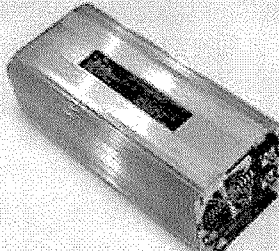

From 0.1 Amp to 50 Amps, available from PowerStream, including auto-to-laptop boosters, car audio boosters, 24 volt (Humvee) to 12 volt converters, DC source battery chargers, and DC/DC low power modules.

Extreme
Environment
UPS

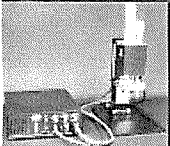

Including AC/AC uninterruptable supplies, and AC/DC uninterruptable supplies which often include the system power supply and DC/DC battery backups which often include multivoltage output.

		<u>DC UPS Power Supply Board</u>	Universal AC Input, battery backup, multioutput power supply board PST-DCUPS-30		
		<u>DC Input ATX Style Computer Power Supplies</u>	For running a computer from a DC Bus or Battery, 24 volt and 48 volt input models.		
		<u>Inverters</u>	Inverters convert DC to AC, we have inverters from 75 watt to 2500 watt, some including battery chargers and battery testers.		
		<u>48 Volt Power Supplies and DC/DC Converters</u>	DC/DC Converters, wall mount power supplies, power over ethernet, and battery backup products for 48 volt systems.		
		<u>12 Volt Power Supplies and DC/DC Converter Catalog</u>

SALCOMP - POWERING THE MOBILE WORLD

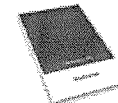

Founded in 1975, Salcomp is one of the world's leading manufacturers of power supplies for mobile phones and other personal handheld devices. Our production is mostly based on high-quality switch mode technology in addition to developing and manufacturing the linear chargers. We also manufacture chargers and power supplies for other electronic handheld devices.

Salcomp is well-known for top quality products. Our success is based on close customer service, active research and development work and efficient production, combined with highly advanced materials management and logistics.

PRODUCTS

Salcomp mainly focuses on mobile phone chargers. In 2005 mobile phone and cordless phone chargers corresponded to approximately 99% of Salcomp's sales volume and net sales.

Salcomp specializes in switch-mode chargers that are technically more developed, lighter and faster than linear chargers, which form the other main product area.

Recall Notice for

Timex Outdoor

Timers (Model No.

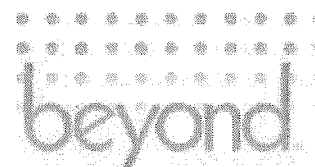

Welcome to Salton!

We are a leading domestic designer, marketer and distributor of a broad range of branded, high quality small appliances under such well-recognized brand names as Salton®, George Foreman™, Toastmaster®, Breadman®, Juiceman®, Juicelady®, Westinghouse®, Farberware®, Melitta®, Russell Hobbs®, Tower®, and Haden®. We have the leading domestic market share in indoor grills, toasters, juice extractors, bread makers, griddles, waffle makers and buffet ranges/hotplates and a significant market share in other product categories.

We also design and market tabletop products, time products, lighting products and personal care and wellness products under such brand names as Block China®, Atlantis® Crystal, Sasaki®, Calvin Klein®, Timex®, Ingraham®, Timex®, Westclox®, Big Ben®, Spartus®, Stiffel®, Ultrasonex™, Relaxor®, Carmen®, Hi-Tech®, Mountain Breeze®, Salton® and Pifco®. We believe that our strong market position results from our well-known brand names, the breadth, quality and innovation of our product offerings, our strong relationships with retailers and our outsourcing strategy. We market and sell our products globally through an internal sales force and a network of independent commissioned sales representatives.

PIFCO

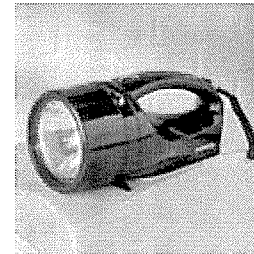

The Pifco brand has been established for over 100 years and has become a strong premium brand in the lighting, travel, airtreatment and battery markets with a reputation for quality and innovation.

The lighting range is made up of Christmas lights, Torches and Lanterns. The high quality of the Christmas lights is re-inforced by the fact that Pifco is the only brand in the UK market to offer a 2 year guarantee on all its Christmas lights. Pifco leads the market in the development of innovative torches and lanterns, with ranges such as the new Evo range. The Evo range of torches uses the latest LED technology to give the consumer major benefits over other torches in the market.

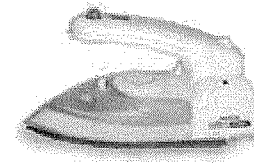

The travel range of products offers more features than other products in the market at similar prices. In addition to this the complete range benefits from a very strong travel promotion in collaboration with one of the largest travel operators in the UK.

The fan range is being constantly developed to offer retailers the opportunity to trade consumers up from the standard white fans to products that offer more lifestyle benefits to consumers, such as the new airblaster range.

Pifco offer a full range of batteries under the Pifco brand and also supply own label brands.

GUIDE LINE OF QUALITY

Sako group enterprise is a private owned enterprise and was established in 1993. The original factory building was located in the Liushi City of Wenzhou in China. Owing to being too busy to make proper response to the numerous orders, and the premise that the factory building and the facilities needed the expansion, the company was moved to the Yueqing Central Industrial Park in 2004. We commit ourselves to the R&D and manufacture of the power supply and electrical testing equipment. Our annual business volume continues growing steadily, and our goal is to strive for the greatest competitive superiority.

Rational Concepts of Operation

⊙ Providing the customers products of the added value.

◎ Possessing the competitive manufacture capacity, and conforming to all kinds of demands of the customers.

◎ Creating the high quality working environment, enabling the staff to be at the most appropriate position, and achieving the company's target.

Future Perspective

◎ To be the excellent competitor of the power supply.

◎ Seeking for the growth on quantity and the promotion on quality.

◎ Heightening the occupation rate in the market with differential products of new concepts.

Quality Policy

◎ Corresponding to the customer's expectation.

◎ Precaution is prior to examination.

◎ Everlastingly pursuing for the prominence.

Sako group enterprise achieved ISO9001 certification and have put the worldwide process and quality standard into practice for consistent quality performance. Our dedicated engineers and testing facilities review processes at every step, looking for ways to increase the quality and reliability of our products.

Customer Satisfaction:

Sako group enterprise put people first. We spend time learning the requirements our customers have, well before we apply the latest technology to meet their needs. After receiving our products, our experienced technical supports staffs will be more than happy to assist our customers by all means. It's this reputation for service and support that contributes to the high degree of trust between Sako group enterprise and our customers. We hope to continue to improve our service and support even further, making every customer feel like a part of Sako group enterprise

Sanken Switching Power Supply - Maintaining the State-of-the-Art Technology

[| Applications](#) | [Lineup](#) |

Switching power supplies convert AC or DC power to the DC voltages, required by the equipment, SMPS's are widely used in electronic equipment such as computers, office equipment and communications equipment. With our unique current resonant-mode circuit, and integrated semiconductor and power device technology, we have earned an outstanding reputation with products such as Sanken's resonant-mode power ICs, among many makers of communications, office and factory automation systems.

We are also the leading supplier of customized switching power supplies to the data communications and office equipment market, in addition to the general-purpose SMPS's introduced here.

[Applications]

	Computers	All types of computers including mainframes, servers, workstations, and PCs
		Peripheral equipment such as storage devices, displays, printers, ATMs, and POSes

Industrial equipment	Communication equipment	Wired communication equipment such as electronic exchanges, transmission equipment, and household-communication equipment
		Wireless communication equipment such as mobile-communication equipment and transmission equipment
		Communication-related equipment such as broadcasting equipment and telemetric equipment
	Control equipment	Factory-automation controllers, robots, NC devices, current controllers, semiconductor-manufacturing systems, photographic developing equipment
	Measuring equipment	Analyzers, oscilloscopes and semiconductor testers
	Medical equipment	CTs, MRIs, ultra-sound diagnostic equipment, blood analyzers, electro-cardiographs
	Others	LED displays, automotive devices, testing equipment and other devices
Home electronics	AV equipment	TVs, videos
		Game consoles, karaoke and other amusement devices
		Digital audio, CD and DVD players, electronic musical instruments
	Others	Power adapters, home appliances, etc.

[Lineup]

General-Purpose switching power supplies

Unit power supplies

Output	Input voltage(VAC)	Series	Output power(W)	Output voltage(VDC)			
				5	12	15	24
	100	CSJ	10, 15	•	•	•	•
	100	CSH	25, 50, 100, 150	•	•	•	•
	100	SSG	5, 10, 15, 30, 50, 100, 150	•	•	•	•

Single output	100	SSH	25, 50, 100	•	•	-	•
	100, Wide-range input/input switching	SLS	5, 60, 100, 150	•	-	-	•
	Wide-range input/continuous input mode	SWA	15, 30, 50, 100, 150	•	•	•	•
	Wide-range input/continuous input mode	HWA	50, 100, 150, 300, 600	•	•	•	•
Multiple output	100	SLM	12, 15, 30	Refer to the individual specifications

SANKI POWER SUPPLY SERIES

-  On Board Type Mini-Switching Power Supply Module Single Output 2.5W 5W Series
-  On Board Type Mini-Switching Power Supply Module Double Output 2.5W 5W Series
-  On Board Type Mini-Switching Power Supply Module Three Output 5W 10W Series
-  On Board Type Mini-Switching Power Supply Module Single Output 10W Super-Thin Series
-  On Board Type Mini-Switching Power Supply Module Double Output 10W 15W Series
-  On Board Type Mini-Switching Power Supply Module Four Output 10W Series
-  On Board Type Mini-Switching Power Supply Module Single Output 15W 20W Series
-  On Board Type High-Performance Mini-Switching Power Supply Module Single Output 5W Series
-  On Board Type Mini-Switching Power Supply Module for Ammeter Five Output 2.5W Series
-  Unit Type Switching Power Supply Series
-  DC Isolation Mini Power Supply Module (DC-DC) 1--2W Series
-  DC Isolation Mini Power Supply Module (DC-DC) 3--10W Series
-  Lightning Surge Absorber LSA Series
-  Fast Transient Suppressor FTS

APC POWER SUPPLY SERIES

APC Depuration Power Supply (1kVA~150kVA)

APC Switching-Frequency Power Supply and UPS Series

About SANKI

□ Profile

□ History

□ Company Culture

□ Qualification & Certificate

Shanghai Sanki Electronic Industries Co., LTD, founded in Jan. 1992, is a Sino-Japanese Joint Venture Enterprise invested by Shanghai Electrical Apparatus Research Institute and Japan Sanki Industrial Co., LTD.

Shanghai Sanki Electronic Industries Co., LTD company's main business are aims at developing •producing and selling Electromagnetic Compatibility (EMC) Test Equipment and switching power supplier.

During more than ten years, Shanghai Sanki has engaged in popularization and promotion of EMC technology. Our products fill the blank in EMC field of China. On account of high-quality and low-price, it is affordable for more Chinese enterprise to use these equipment. Our equipment are working efficiently to improve the electromagnetic compatibility of their electrical products.

Through the developing during these years, Shanghai Sanki has been in the top position of domestic EMC equipment supplier. In China, many famous institutes, testing organizations and colleges, especially a number of manufactories of electrical products, have become our users and kept a close relationship for cooperation with us. The equipment we are providing to them include these following: Electrostatic Discharge Simulator (ESD), Electrical Fast Transient Burst Generator, Lightning Surge Simulator, High-Frequency Noise Simulator, Cycle Sag Simulator, Damped Oscillatory Wave Simulator, Artificial Mains Network, Electrical Fast Transient Burst Suppressor, Multi-function Lightning Surge Absorber. In recent years, these following systems are also recommended: the Integrated System for High-Frequency Radiated Electromagnetic Field Immunity Test that base on the core of GTEM cell, the Integrated System for Conducting Inject aroused by Induction with Radio-Frequency Field Immunity Test, the Integrated System for Electromagnetic Disturbance Pre-test, the Harmonic Current Emission Pre-test System.

As another contribution to the popularization and development of EMC technology in China, Shanghai Sanki, every year, holds EMC technology seminars several times to propagandize the EMC standards and the varied solutions to EMC test. So our users' problems about EMC technology are indeed concerned.

Our engineers, as the members of National EMC Standardization Organization, attach themselves to the task drawing national EMC standards, and participate in many domestic and international professional seminars.

Since more than ten years, Shanghai Sanki has made a quiet great progress. We have achieved and received many honors and certificate including the title of "Shanghai High Technology Enterprise", ISO9002 certificate authenticated by Germany TUV Rheinland (has updated to ISO9000 of version 2000), the title of "Shanghai Excellent Enterprise". Our products won the gold medal on Shanghai Science and Technology exposition. Shanghai Sanki's turnover is increasing at an average rate of 30% -- 50% each year. In order to need the demand for progress, Shanghai Sanki set up a manufactory to produce switching power supplier, and launch an extended factory in Shanghai Changzheng Industries Estate. Shanghai Sanki Electronic Industries Co., LTD is thriving and going forwards to new stage.
