RE: Docket ID:

EPA-HQ-OPP-2010-0119

EPA-HQ-OPP-2008-0440

EPA-HQ-OPP-2009-0059

EPA-HQ-OPP-2008-0560

EPA-HQ-OPP-2008-0345

EPA-HQ-OPP-2008-0119

EPA-HQ-OPP-2008-0883

Dear Administrator McCarthy,

We urge EPA to ban all uses of these seven neurotoxic organophosphate pesticides immediately: chlorpyrifos-methyl, dicotophos, dimethoate, ethoprop, profenofos, terbufos and tribufos.

This class of pesticides has been proven to cause neurodevelopmental harm to children and to poison farmworkers and others in surrounding communities when they're sprayed in agricultural fields.

After years of delay, your agency recently acknowledged the extensive evidence that exposure to these pesticides damages development of children's brains. It's time to act to protect children from reduced IQ, delayed development, autism and attention disorders associated with these dangerous pesticides. EPA should take immediate steps to ban these brain-damaging pesticides in order to:

- * Protect children from learning and memory impairments
- * Protect communities from pesticide poisonings when the pesticides drift off crops and into nearby neighborhoods and schools
- * Prevent contamination of drinking water with these pesticides
- * Prevent worker poisonings and harm to their children

Action on these toxic chemicals is long overdue. We urge you to ensure that your agency moves quickly to ban these pesticides now.

Thank you for your consideration of this important issue.

Sincerely,

Pesticide Action Network North America and United Farm Workers, and on behalf of the 22,452 below, concerned citizens from all 50 states, Washington, DC and several Canadian provinces.

It seems to me that the EPA is not doing their job to begin with, by allowing such pesticide to be produced in the first place.

We're being poisoned by
our government
agencies, decimated by
republican cuts, just to be
able to scream, "see, the
government doesn't
work, we need smaller
government" cause, Flint,
MI. Republicans are a
danger to our democracy
and to a government that
works for us all, not just
for the 1%.

Time for brain-harming
pesticides to go nów &
foréver!

This so-called problem is
monumental. The use of
pesticides, herbicides
too, is killing some of us,
Cancer being the main
cause directly by
chemicals, compounded
by chemo, more
chemicals.

Why in the world havent
you banned these yet
epa.
The brain you save might
be your own!

These are damaging chemicals and these pesticides must not be used because nobody should be exposed to the harmful effects that cause permanent nerve damage. This is irresponsible .

No more pesticides! Quit poisoning people!

Stop this pesticide madness!

Urging EPA to ban all uses of the seven OPs now up for review!

I am still not sure that I understand why poisoning people is not a crime. Perhaps because it is done slowly?

This is totally unacceptable. It is getting to the point that it is sounding like Flint's governor deciding to save \$100,000 and ending up poisoning the citizens of Flint. Don't think that is a comparison you are interested in being made.

EPA- please do your jobs!

It should be criminal to poison anyone, never mind many people. Many people do not protest these dangerous chemicals because they cannot believe that any sane, educated person would knowingly poison people.

I wonder about a link to Alzheimer or other forms of dementia.

Do Your Job! Ban this Poison NOW!

The video "Secrets Police Don't Want You To Know" at <http://youtu.be/B3nok7Cby28> is 2.5 hours long but it's totally worth your time to watch the whole entire thing because it exposes how the cops, judges, prosecution attorneys, politicians, and car insurance salesmen have stolen BILLIONS from the common people as well as the secrets that anyone can follow to prevent them from stealing that money. Also check out the scripts related to the video at <http://logosradionetwork.com/tao/> This video can help put a stop to tyranny and in turn bring freedom and higher consciousness to all! So please help me in my crusade to spread this info like wildfire on a global scale.

We already have TOO MANY TOXIC chemicals which we are TOLD are safe. That is what was said about DDT TOO !!! Our children are loaded with these chemicals, which are bad enough one at a time, but in combination are hurting our children AND US in ways we are just beginning to see. AND there is NO REVERSAL chemical !!

I believe this to be of the
utmost importance!
Sincerely, Isaac Nyden

we need legislators like
Elizabeth Warren, who
care about people and
can't be bought.

As a mother and a concerned citizen, the fact that these brain damaging chemicals are in our environment is one of my primary concerns - there is no place for this anywhere in the world, let alone in a first world country. Our children are our future, and just because they cannot vote and don't have deep pockets does not mean that their welfare should be such a low priority. It is a travesty and must be changed. This is but one step in that direction.

There are better alternatives to toxic pesticides. Stop allowing corporations to poison people.

An ounce of prevention is worth a pound of cure-- an old one, but still a good one.

As a mom, I find it horrifying that many kids may not reach their potential because of being exposed to these chemicals. Please ban these pesticides.

do your job

Do not hurt our brains. We will be upset.

These dangerous chemicals shouldn't be approved.

For the sake of our children, please !!

We must address these issues now. Once the damage is done, it is irreversible!

These chemicals affect everyone. Even those who make the decisions to ban or keep a pesticide on the market are exposed in some way. We are all in this together. Please do what is right.

We have noted a neurotoxic of xenobiotics especially pesticides using freshwater fish as an animal model. Xenobiotics have a positive role in agriculture. But still in some villages farmers use natural fertilizers for cultivation and received good yield. People show great interest on it, they are ready to pay high. We know pesticides save our cultivation from pathogens, yes of-course, but we don't know that pesticides are using crop as a carrier to kill humans and environment. There is a parallel growth between the pesticides and new diseases. Please say NO to pesticides.

Poopal	Rama Krishnan	poopalramakrishanan@ymail.com	641046
--------	---------------	-------------------------------	--------

How can we survive as a civilization if we continue to damage our children's brains with these chemicals? Human health and safety MUST come before profits. Please.

within the regulatory requirement of "known harm" and must be removed from public use, especially when non toxic alternative chemicals and practices are readily available. Limitation of exposure to known neurotoxins is an urgent issue for the most vulnerable populations (developing fetuses, children, elderly, already health impaired people). However, in this day and age, where exposure to neurotoxins and toxins that impair other biologic systems is at such a high level, all of us carry an overly high, unsupportable chemical burden. It is now common knowledge that toxic chemical exposure is so widespread across the globe, that toxic chemicals are being

Obama twice and I am extremely disappointed in his failure to protect the American public from toxic chemicals. When I was in college I took courses in biology, general chemistry, organic chemistry, zoology, math and statistics. I have studied the issues associated with pesticides and am extremely concerned about the health effects. When I took chemistry courses, one of my professors told us that the effects of exposure to chemicals might not show up for decades. He wanted us to be aware of the fact that not all actions have immediate impacts. I am virtually certain that this will be the case with pesticides. When I was in law school I was taught that the role

My aunt, uncle and their nine children used to have a dairy farm and fully half the family, decades later, has health problems like cancer that their doctors think came from pesticide use in the 1950s, 60s and 70s. In our extended family, only these have come down with cancer and we have a large clan. I could give you their life stories, like my cousin with a wife and two young sons who had to give up his PT business to fight pancreatic cancer at age 53, but please remember it is real people being poisoned by these chemicals.

These 7 neurotoxins are very harmful to humans and animals.

~
 strong enough, how
 about DEMAND that you
 ban these chemicals!! wtf
 does it look like to other
 countries when they have
 banned all these
 chemicals but the
 GREEDY USA still uses
 them to sicken and KILL
 their PEOPLE??? We
 know you scumbags don't
 care about us only your
 money you get for the
 scum corporations who
 own you!! So if you can't
 or won't do this Gina
 then fucking resign, it's a
 s easy as that scumbag!!!
 Yes you are a scumbag
 for letting these
 corporations run wild and
 kill everything in their
 path for profit, you make
 me sick you bitch!!! I so
 hope that all you
 bastards get your karma
 for killing all of us and our
 wildlife, you filthy scum
 who get paid to ruin the

You've been given a very important job, and the whole country is counting on you to protect everyone not just big business. We've known for a long time how dangerous these pesticides are, now we need you to step up and do something about it!

Stand strong for our childrens!

We can solve all problems organically as nature has plants that naturally repel insects. Marigolds planted beside other plants is just one of many.

Neurotoxins are heinous.

As a new mom and health worker (dietitian) having access to healthy food without pesticides is especially important to me.

Ditch the bad pesticides! We must protect the people and the environment!

stop allowing these
horrid chemicals to be
used!

I do not know why I am even sending this email. The people in charge of the EPA have long since SOLD THEIR SOUL to the DEVIL along time ago. I can only hope with TRUMP in office he will clear the EPA of all the TRASH and get honest people in there.

This country has been lulled into thinking chemicals are okay and they are NOT!! Time to step up for radical change and get back to basics, and stop bowing to corporate interests! These companies should be part of the solution, NOT creating more and more poisons. They need to change their structure just as all of our government agencies need to change to more radically SAFE behavior!

Sharon	Intilli	greenbe8@warwick.net	10990	NY

I full agree with the banning of all O.P. pesticides. If you maintain their registration, a full statement of adverse health condition should be on all labels.

This is an urgent matter with already dire consequences.

U think that SHIT is so great why don't u spray the white house with it!!!

These chemicals are harming our earth, and all life on it. We have already lost many of the species and are to lose more if we don't stop using them.

Stop poisoning our planet!

These pesticides must be banned!

why in this day and age
poison for profit is still
legal is beyond me. is
money, profits worth
more than human life?

Please make a stand to
stop the dangerous use
of these pesticides.
Shouldn't the health of
our children and those
exposed to these noxious
chemicals supersede
corporate profits? We are
so tired of these trade
offs!

I still suffer the Effects of
Agent Orange - I know
first hand what Toxic
Chemicals can do .

Our environment and our children's health is more important than the business of making these toxins. Please shut them down.

Are you even aware where neurotoxic pesticides got their starts? As military grade chemical weapons agents. The difference between a WMD and a pesticide is quite often DILUTION. A never agent has an instantaneous effect a pesticide has a long term effect as witnessed in those military mildly exposed to mustard agents. For the rest of their lives with one exposure.

It has been a long time since the publication of "Silent Spring", but pesticides are still contaminating our environment and people as well.

Protection Act (FQPA) signed by President Clinton in 1996 was intended to make our food supply safer from the OP pesticides and safeguard our children too. But this has not happened because EPA's pesticide registration program exists to promote the interests of agricultural stakeholders at the expense of the American public. This isn't about sound science, this is simply about compromising the safety of the American public and our nation's environment to appease politically powerful agricultural interests. Enough with Atrazine. Enough with the OPs. And enough with the neonicotinoids killing our

Chemicals are not natural, they are foreign to nature and contrary to it in every way. Their use is to be condemned, not supported for greedy human profit motives. Human beings are destroying the planet and everything n it, what a legacy to leave your children and grandchildren, one of total corruption, dishonesty, greed and immorality ;;; greed for the gold. "The love of money is the root of all evil" and humans must find God, the real God, in order for change to occur. God is a God of Love, St. John plainly states in in the Bible ... look for ourself. We as a society must do right and our country is far from it now, heading to its own destruction

My son suffered OP poisoning at school in first and second grade. We wondered why he had trouble learning and test scores came out low. The teacher said, "Don't worry, they all came out low." The whole class was exposed and half had chronic symptoms of OP poisoning, although ours was the only pediatrician to do the RBC cholinesterase test. Therefore, he was the only one properly diagnosed. OPs have NO PLACE in our food or agriculture. Organic farmers do it right.

Politician Corporate Shills
must be imprisoned!

We are killing people and
animals with the
residuals from these
chemicals. For example
When I was a child your
dog died one of two
ways...either died of old
age or got hit by a car.
Today we have Vetinary
Oncologist....what does
that tell you!? Stop
posing our environment!

When I saw the MDS sheet WHAT A JOKE!!! 93% of the ingredients are kept secret, so how can they say they are safe??? BAN THESES ALL OF THEM Time to protect or kids future health and not the chemical companies
Corinne	Lavallee	mstootsie@cox.net	01521	MA	Kristina Townsend
Sandy	J.	sj1183@yahoo.com	10019	NC	it is time to stop using all these chemical

Pesticides are one of man
made environmental
hazards that cause
problems most serious in
children's developing
brains, and also to a
lesser amount but still
effects adult brains. We
need to work on these
pollutants one at a time,
so please start with
these. I'm a retired
chemist who has
analyzed for the
possibility of pesticides in
our municipal drinking
water.

Health trumps profits.

These are NOT safe. Our children are our future. It is more important to protect our children than it is to protect the obscene profits of industries that care nothing for people and put profits above people. It is time.

It is hard to believe that the EPA HAS TO BE PUSHED TO DO THEIR JOB,most of these terrible pesticides have only been approved by the people that are making them,this is like having a fox guarding the hen house,I find it to be ridiculous,& our children are paying for this.Thank you.

WE can't allow lives to be risked this way.

Please ban these chemicals, there are other ways to control insects.

Do you care at all about the next generations and the legacy you are leaving?

If we don't do this for our children, who will?

My nephew suffers a severe case of autism. I beg and plead with you to please help put an end to these toxic chemicals so that no more parents have to endure the suffering of seeing their children in diapers at age 8 and severely developmentally disabled for life as a result of ingesting these poisons. Thank you for representing us.

Please eliminate these harmful chemicals!!!

They should never have been allowed in the first place. This country shamefully works backwards.

If it's bad for the workers, how can it possibly good for consumers and their children. It seems pretty simple - harmful to the farm worker, harmful to us, the people that eat those fruits and vegetables! We can do better! And we should! Please BAN all uses of these seven neurotoxic organophosphate pesticides immediately! Thank you,

WHY? WHY? WHY? Do we need to continuously make these kinds of requests? What is your job? Did you see where China refused cotton from the US? Sure it probably had pesticides.

Anita	Cannata Nowell	anitanowell@hotmail.com	75657	TX
Maureen	Peterson	moepeterson14@gmail.com	33707	FL

Pesticides are roving to be a major source for physical and mental deformation of adults and children. The toxins in the drinking water have caused the increase in neural retardation in many children. This is a criminally dispicable act and a crime against humanity!

THE EPA NO LONGER
 PROTECTS ANYONE OR
 OUR ENVIORNMENT!
 THEY ARE THE "EPA"
 ENVIORNMENTAL
 POLLUTING AGENCY!
 WAKE UP!! THESE
 SOCIOPATHS AREN'T
 GOING TO STOP THIS
 UNTIL THEY ARE ALL
 REPLACED WITH
 HUMANS THAT
 ACTUALLY LOVE
 HUMANITY AND THE
 PLANET!!

We live, breathe & eat food grown in a chemical stew.

As a teacher in our public schools, I see evidence of the damage our toxic environment imposes on the brains of our youth everyday. You can help halt the the use of these known poisons. What are you waiting for?

We have to stop all pesticides, because all of them make damage to our bodies and our children future. Thanks .
Alla

the world is watching

Farmworkers and their children should not have to bear the burden of health issues as a result of use of these pesticides!
WHY is it taking so long to get you to respond to this problem???

These toxic chemicals have got.to.go!
My child was affected very badly (difficulty breathing) by Naled, an organophosphate, which was placed on three trees near his school playground.

When will we start protecting our children from pesticides???

Iona	Singleton	iona.sing41@gmail.com	86305	AZ
Jodi	Rodar	Hooppole@gmail.com	01108	MA

It is so counterproductive for a society to allow these chemicals--the costs down the road just don't justify the agro-business lobbying. Bring back bio-diversity and we'd all do better...

Anne	Burnham	annemburnham@comcast.net	15217	PA

Pesticides are poison and they have no place in our food.

No sane society would ever concede to put its children at risk for industry profit. Let us please demonstrate a return to sanity.

I have personal experience with health damage due to these pesticides. Ban them.

Our agriculture and energy systems are not sustainable. We must transition to small to medium scale organic farming and renewable energy as soon as possible.
shoot yourselves you gd evil worthless feds cant make it in real world waiting on your pensions you bunch of fat ass losers doped and dumberd down sheeple

I am the Director of Environmental Stewardship at Clif Bar and Company. We are a company committed to supporting sustainable, organic farming systems that do not put people's health at risk due to the use of toxic chemicals. I urge you to do everything you can to ban these brain-damaging pesticides. There is a healthier, safer and more sustainable way to farm.

We MUST protect against toxic pesticides.

Please stop selling these nasty chemicals that are hurting us!

Thank you.
 That these constitute a highly toxic category of chemicals is not news: enough w the studies, enough with the poisonings and the bioaccumulation the extent of which we will never know for certain. Ban organophosphates (these 8 are a start).

Please ban these toxic chemicals now!

It's about time that regulations change!! Why isn't it the manufacturers' responsibility to PROVE CHEMICALS ARE SAFE BEFORE THEY ARE USED BY THE PUBLIC, rather than The responsibility of the public to employ scientists and lawyers to prove that the chemicals are harmful?!?! (All the while chemical manufacturers are making billions of dollars and innocent people and the environment are being exposed and harmed!!!!!!) It is such a simple solution. On behalf of the American people, I beg you to make this policy!

We don't need these
poisons and our children
and field workers and
farmers shouldn't have to
be exposed to them.
Never mind wildlife and
waterways, as well.

This is the work I expect
EPA to do to protect
people and the
environment.

The studies have all shown these chemicals are very dangerous. We need to stop using them.

The era of corporate reign over our lives is coming to a close. Those who continue to support and promote their criminal agendas will be judged and sentenced accordingly as crimes against humanity. Please choose to be on Humanity's side. Thank you.

ALSO. it is imperative that the Office of Waater issue a MCLG ofZero for fluoride. The status quo is allowing lead poisoned Flint, Michigan children to be fluoride poisoned as well- both neurotoxic.

It is so important that we end the use of these chemicals. Let's do it!

Would you walk out your front door and spray DDT where your grandchildren play? What we are dealing with here isn't much better. Think about it. The money those chemical companies are slipping you, is it worst the health of YOUR grandchildren?

It's time. The right people are on the case and they already know in their hearts what they must do.

Two of my precious, innocent grandchildren are autistic because of the selfish greed of big polluters whose chemical toxins destroy lives. PLEASE stand up for the good of ALL!!!!

Neurotoxins should be banned. Period.

Enough!

Our future generations
are already broken.
Thanks EPA....do your
job!

Ban these pesticides, we don't need them. We got along fine without them for years. Now they're poisoning us. Do the right thing, save children from these toxins. Please

OK, EPA, it's time to do something that is CORRECT & RIGHT! This is better than classifying CO2 as a Hazardous Gas; when we would all die without it! Ban all of these REALLY BAD Chemicals... Do what is right! Thank you very much!

We can find (have found?) better ways to produce food than resorting to this toxic mess. Let's do it.

I find it very disturbing that the EPA listens to closely to the Chemical & Agricultural businesses, which profit greatly from the sale & usage of chemicals while crops are raised with them, which then enter into our "food chain". Consumers' health is the priority -- not the ease of bringing crops to harvest, no matter what their after-effects might be on our health!!

Jeannie	Mckenzie	jeanniemck@yahoo.com	94611	CA	

city of Los Banos
 California, Newspaper
 reporters as well as clean
 water Activist like Erin
 Brokovich, warned us of
 the toxic Hexavelant
 Chromium in our water
 for many months. The
 city knew about the crisis
 long before. Hence... I
 just started a Care2
 petition: Demand Los
 Banos, CA toxic drinking
 water clean up now!.
 Please help me get more
 people to sign my
 petition. Right now I've
 got 11 signatures — will
 you help me collect more
 and then use the link
 below to share it on site
 or on your Facebook
 Twitter followings?
 Here's a link to the
 petition:
http://www.care2.com/go/z/e/AuSqj/zoyY/cht_a
 And here's a link to share
 it on Facebook:

Greg	Allbee	fender777@gmail.com	76021	TX

government or by our so called representatives to protect our children and families is almost non existent. The corporate being can poison our children with chemicals for years or decades , drugs with inadequate testing by the drug companies are allowed onto the market place and cause over 100,000 deaths from adverse reactions in the United States alone heaven knows how many die in other nations and big agriculture businesses are allowed to continue to overuse antibiotics and take us back to a time where a simple scrape on a child's knee could mean death or a mother dying after child birth and these are only three examples of probably hundreds. It is way beyond time to

STOP POISONING OUR
ONLY EARTH!

There is no need for these poisons. If food is grown as it is meant to be it is nutritious and safe. The monetary greed of agribusiness has to be stopped. You accept only the "evidence" of research conducted by the very people benefiting from it. This is not science. It is fraud and greed. Stop the Monsanto Monsters before the whole planet is poisoned! The harm these chemicals do far outweighs the 'good' and they should all be unconditionally banned.

These are the same chemicals that are banned in Europe from many years ago aren't they? Well....that would explain why Americans are so dumb compared to the rest of the world....

Pesticides are increasingly causing illness and cancer contributors - it is sincerely long overdue and urgent that Govt. take action to ban ALL harmful pesticides on our food and in all products we use.

All poison is poisonous to all life, and deployment and use of poison has enduring harmful affect and effect.

Please make good decisions.

Independent research should be weighed over chemical company-sponsored research!

Yes it is time to ban all
brain harming pesticides
You've got the evidence-
please act now!

Stop killing babies and
children!

Let's give People a
chance, over business
Profits. Let's do the right
thing.

The corruption of the for profit alphabet agencies is astonishing but it will come to an end.

Governments surely should exist to protect their citizens welfare and health .

Our tax dollars can only support so many disabled people. If we can't count on the government to protect the children then who can we count on?

Do what's right for the kids!
Why? Why approve any chemical for widespread use which endangers living beings? Why?

End phosphate use.

Ban these Pesticides
NOW !!!!!

Doctors like me educate
patients to avoid these
exposures but they are
too ubiquitous to avoid.
They must stop being
used.

Work for us not BIG AG!

The end of the road
needs to be clean and not
a death sentence. We are
destroying human life
and planet life. Why do I
want to eat my future
Cancer! I don't & I won't.
Toxins are always
unacceptable!

Everyone needs to
reconsider ... & clean up
the mess we've let occur

Simply just do your job

Birth defects on the rise
exponentionally, learning
disorders, autism,.....it is
time to call a halt
tonprotect the next
generation.

These noxious chemicals
should have been banned
long ago - we need to
remember Rachel
Carson's "Silent Spring,"
because we are on the
way to the final silence.

Wake up, do this now!!!

Imagine if your children were exposed to these chemicals.

This has gone too far! It is now time to not only stop toxic chemicals but to launch a class action law suit against companies that have done this damage.

Aren't you sick of cancer everywhere, neurodevelopmental damage to our kids, and violence from chemically damaged brains. Pesticides and herbicides play a big role--they're a one way road to superbugs, superweeds, and super-sick people. Ban them - our life depends on the health of our ecological system.

neuro means 'nerves'; toxin means 'poison'. so why are we allowing 'nerve poisons' to be used around living beings unless we mean to harm or kill them?

If your intention was population control (high rates of infertility, miscarriages and birth defects); the neural impairment of our children; the killing of our pollinators and endangering our food supply; bringing numerous species of wildlife to the brink of extinction; and consigning the rest of us to suffer a myriad of diseases at ever increasing rates, massively driving up medical costs, then you're doing a bang-up job! If any or all of the above was not your intention, then I suggest that you finally take steps towards banning these toxic chemicals. Anything less is unconscionable.

Our environment is bombarded with toxic chemicals and this threat to our health grows every year with activity from the likes of Monsanto and a growing list of chemical producers. So many (if not all of them) are unnecessary as there are alternatives to all of these highly toxic materials if the EPA and other governing bodies would do their job and demand that these companies develop/employ harmless alternatives.

I would also like to see a ban of herbicides such as Roundup and Rodeo in our parks, golf courses and on our food.

You know what harm they do, now just STOP them.

Fluoride is also a brain damaging chemical and admitted by the EPA. It's time to stop adding fluoride chemicals into the water supplies in a failed effort to reduce tooth decay

Stop the poison

This is a no brainer.

Our country needs to be protected from harmful chemicals, especially in our drinking water. SAVE LIVES. AND SAVE BRAINS. PEOPLE WAY BEFORE CORPORATIOONS.

We are being poisoned
every which way from
Sunday. Please take swift
action to change this
unfortunate reality.
Thank you!

The Chemical Industry is as conscienceless as Big Tobacco, Big Oil, et al-- putting profits above human and planetary health. Its high time they are severely regulated and reined in. Thats the role of Government: to protect the many from the wealthy, powerful few!!!

We are ALL exposed to these chemicals! Illegal in other civilized countries. Is it any wonder why the US ranks so low in overall health & longevity & so high in disease? We need to take back control of our food sources & go back to supporting small organic farming & our communities. Do you know what you're eating? Most people don't, since big agro lobbyists discourage proper labeling of foods & sway research in their own favors. What a conflict of interest & a huge joke.

Chemical corporations have become rogue companies that routinely endanger the health and welfare of people and nature around the world. This must end now!

Not only are they in our foods they are in our air and water. Those who do not learn from history are doomed to repeat it. Are you going to stand behind half truths to save face and lose our Biosphere???? I am a Veteran, Active Voter and TaxPayer. As a Veteran I put my life on the line for Democracy. This missive is Democracy in action. It is a sad fact that national socialist philosophy now informs and drives the republican party.

The use of these neurotoxic pesticides is like the lead poisoning of children in Flint, MI. The difference is it occurs over a wider area so it is easier to sweep under the rug. In the end, it too poisons people in irreversible ways and is unamerican and unpatriotic.

Carol	Tuveson	ctuveson@msn.com	03824	NH
-------	---------	------------------	-------	----

I have never understood how a government agency with a names such as yours, finds ANY pesticides to be protective of the environment. Surely this makes your name a joke!

~

November 25, 1960, the Columbia Broadcasting System broadcast the final documentary for CBS by legendary broadcaster Edward R. Murrow, an installment of their series "CBS Reports," entitled "Harvest of Shame" (https://www.youtube.com/watch?v=yJTVF_dya7E). Much has changed of course in the fifty-five years since that documentary first aired, but working conditions for migrants -- and many other workers -- remain shameful today (<http://www.propublica.org/article/a-modern-day-harvest-of-shame>), with our technology now a far greater contributor. Originally developed in the 1940s as highly-toxic chemical-biological warfare agents,

Stop poisoning people and the planet.

Hasn't Monsanto done enough harm to this world? Now we have the mess they made in Columbia and Brazil with the mosquito larval disruptor chemical that is causing microcephaly and they want MORE chances to poison us and the rest of the world? We have had enough of their profit driven greed. Their profits are NOT more important than the health of the entire world!

BAN this terrible stuff
now! Don't ruin brains!
Thanks.

Let's work on not
harming for now.

Let's be more conscious
of the impact we have on
our environment and our
own futures. Profit is NOT
everything. Our health,
our food supply, and our
very future is at risk due
to our shortsightedness.
Please stop the
madness...

The EPA is supposed to
protect our environment,
period! The EPA should
never take any funding
from corporations you
are supposed to be
protecting the
environment from. The
citizens of The United
States depends on the
EPA to do its job... but
sadly the EPA is failing us!
Do something and make
an unwavering stand
against these companies.
Thank you.

problem primarily due to industry's ability to curry favor with elected officials. The corrupting influence of money in our political system is undermining our democratic traditions and discouraging Americans from voting and/or running for office. This ominous development may well end our experiment in representative democracy unless we alter this decades-long trend. For the sake of the republic, we must amend the US Constitution to state that corporations are not people (and do not have constitutional rights) and money is not speech (and thus can be regulated by state and/or federal campaign finance laws). Short of accomplishing this, no

If an average American harm another person using any instrument is taken to court, fined and jailed. Why don't the law is equally applied to companies that used chemicals as an instrument to cause grave damage to everybody? Maybe because they generate profit? The law is perverted by these misinterpretations and we all suffer this prostitution of the law!

Pesticides are dangerous neurotoxic chemicals that should be banned from use because of exposure to farm workers, their families and children who suffer needlessly from their debilitating effects.

Do your job! Protect people's health! Ban these poisons and encourage the farming industry to find healthy ways to increase their production.

Banning chlorpyrifos in the US may help getting it banned in Australia as well. It was used in the sand pit and playground at my son's kindergarten school to combat termites.

insecticides are extremely dangerous on so many levels. there is not much they don't harm when sprayed into the air or on the ground. they penetrate what ever they touch. the effects are horrible and long lasting. not good for the earth,not good for animals and bees and not good for humans. just not good for anything. they are more harmful than helpful. they cause more problems than they solve. there has to be a better way.

Linking pesticides is one reason for my own family history of Autism, in addition we are experiencing immune disturbances that are being linked to this as well. Interfering with thyroid, leading to leaky gut, and ultimately preventing proper sex hormone production is our latest concern. It's bad enough that the medical community can only lean on more chemically induced medications to assist, as naturopathic medications aren't covered. This must be done in regard to prevention of these medical issues and genetic predispositions that will only bring more health concerns to light.

If we truly want our nation to have a secure future, we must make certain that the children of today are healthy and strong enough to learn effectively in school and be prepared to lead our nation when they are adults. We also have a responsibility to keep our adult population healthy and productive today in the interest of national security.

We know these pesticides are harming us. You can't lie to us now. Do the right thing for once and HELP people to live healthy lives, instead of helping corporations make money that they then pay to you.

Jacque	G.	dragonluckfarm@earthlink.net	78662	TX
--------	----	------------------------------	-------	----

Too many very dangerous chemicals still allowed in the US. Why are we not as efficient and timely as Europe in recognizing and addressing these environmental poisons? Could it be related industry influence? Lets clean it up!

What kind of civilized society knowingly poisons its people and it's children?

Toxic/poisonous chemicals unfortunately were created without forethought of the consequences- the only way to deal with them now is to ban them.

I would think that even the chemical=company representatives would think of sparing children, especially their own, from the insidious effects of pesticides. There are better ways to control pests.

what is the matter with EPA?

It's scary that women could eat these pesticides and then give birth to babies with disorders.

Pesticides are
poisonous.! Period.
Exclamation Point! We
need growers to use
natural means to kill the
pests. Whatever the
pests' natural enemy is,
that is what should be
used. Killing the bees that
pollinate our food supply
is like slow death to us
all.

					IN THE NAME OF JESUS CHRIST SAVE THESE POOR CHILDREN. ARE YOU NOT CHRISTIAN? YOU HAVE THE POWER, DON'T TRY TO DENY IT, TO USE YOUR POSITION WISELY AND STOP THESE POISONS FOREVER. TURN YOUR BACK ON GOD'S WILL AND BURN IN ETERNAL HELL FIRE FOREVER.
Robert	Johnston	r.johnston@mac.com	NOP 2K0	FL	

Every growing season in rural Minnesota I witness the inappropriate application of chemicals to farm fields. This will probably not change soon but the banning of the most hazardous chemicals will surely help protect our vulnerable children and our dear families. THANK YOU!

It is bad enough that these toxins in our environment, but are now used multiple times during the growing season and before harvest, especially for GMO crops! Our food supply, water, and air should be free of these harmful toxins and SHOULD ALL BE PERMANENTLY BANNED.

I am working in the Central American Institute for Studies on Toxic Substances of the Universidad Nacional, in Costa Rica. Also our research has contributed to a better understanding of the risks for human beings and the environment of several of these pesticides, among others used in crops like banana and pineapple. A ban on these pesticides in the US will also contribute to more critical use or even a prohibition in countries like Costa Rica. Thanks and best regards
Do your job and protect us from poisons.

Stop covering for and
protecting the chemical
industry. Farmers in the
1930's and 1940's had 4%
weeds. Now, after 60
years of dumping
hundreds of billions of
tons of toxic chemicals,
the weed problem is
between 28-32%. No
progress to be seen, and
the total destruction of
our soil and people.

No excuses. Ban these
poisons that harm
millions. We can do
better.

this isn't right !!!

Please Consider!!!!

Children's brains must be
protected, not poisoned.

Don't be responsible for
the deaths of millions of
people by approving
these pesticides for
continued use. You must
become conscious of the
damage you are
responsible for!

"Old-fashioned"
agriculture using natural
pest controls, cover
crops, crop rotation and
sustainable, organic
practices leads to healthy
soil, healthy people and a
much healthier planet.

Miraculous how these chemicals do catch up to us. They degrade all living creatures.

We must make a start in reducing and eliminating pesticides, now!

We need to have these toxic chemicals REDUCED in our food and our environment.....NOT the approval for more!!! There are safer and effective ways to raise the food we eat, while cleaning up and protecting the world we live in. Trying to feed a sick and dying population is not an objective any government should be supporting!....but feed healthy people IS!

The facts are
overwhelming.

Have a blessed day.

Do it! Let's put people
before profit for once in
this mixed up society.

This situation should never have reached this point, and it must CEASE now. There are already so many brain damaged people; then add in the additional environmental damage....

I live in a rural farming district and have for over 40 years. beginning in the mid to late 1990's brown bats, honey bees and much native flora has disappeared from our landscape directly due to the GMO farming practices of using glysophate and neonicotinoids on the corn and soy crops. Milkweed is a thing of the past and so are butterflies. Please stop this madness and eradication of plant and animal species. Are we next?
Please do not allow to poison this organic environment.

Thank you.

It is our moral duty to protect our children, our water, our crops, our pollinators, birds and environment. We know this, why delay, why allow more damage to our community for the profit of these corporations- what does that say about us as a society? How do we sleep at night?

 subjected to the same safety standards as pharmaceuticals. A claim to safety is not enough when masses of people are being exposed to toxins. Drugs to treat cancers & other life threatening illnesses caused by these agrochemicals will take decades of careful research & medical trials before they are brought to market. It is absurd that a new agrochemical can be brought to market without the same research. Over the years there have been plenty of terrible events to prove that a claim to safety is not enough. The effects of these chemicals are unknown until water is undrinkable, land is infertile, birth defects are discovered, & other illnesses & diseases are

Toxic chemicals should have NO place in our food chain!

Please take action to ban these neurotoxins.

Professional landscaper
22 years. 95%organic,
NEVER used Round Down
sic

Hey EPA, when you allow
organophosphate
pesticide you ARE failing
everyone in the world.
That stuff spreads around
the world

As a nurse it is a known
neuro toxin

Regulate. Protect.

Sounds like these
neurotoxins would be the
21st century version of
Thalidomide.

Thirty years ago I began working in the pest control industry. At that time organo phosphates were the new improved pesticides and I was assured by mgt.that when they were applied properly they were much safer than other pesticides. However many of the pesticides that the pesticide industry assured me were safe are now considered too dangerous to use. Fortunately I stopped working in the pesticide industry 6 years later and I was rarely exposed to them. However in my opinion any pesticide that must have a label with a Danger Keep out of Reach of Children warning is simply too dangerous to children and the environment.

Our society has a choice. Do we treat our fellow creatures with cruelty and callousness? Or with compassion, respect, and justice? As humans, we have the freedom to make that choice. With this freedom comes the moral obligation to make responsible decisions. Animals have no such choice.

Quit being a dumbass
and being controlled by
the special interests

DO YOU WANT THESE
POISONS AROUND YOUR
FAMILY????

Stop the madness

Please help !!

Well, let's look on the
bright side. We won't
need to worry anymore
about the high cost of
higher education,
because all of our
children will be so brain
damaged that they will
no longer be able to take
advantage of a higher
education.

Poisons sprayed on crops is just wrong.

I'm seeing more ariel spraying of crops and that is scary. My state had an article about teenagers on a field trip being accidental sprayed by a crop dusting plane. This just to easy to drift and blow anywhere and hurt innocent people. Children are especially vulnerable. These need banned!

Does the EPA work FOR the people or just to benefit corporate profits? Isn't it time to work for the "common good?" Do people matter? Do you have grandchildren? THINK CAREFULLY ADMINISTRATOR MCCARTHY!

Julie	Giessler	jgiessler@hotmail.com	14469	NY
Juls	Robertson	robertsonjuls@gmail.com	96707	HI

Poisons are never okay. Never. We want a clean, wholesome world; the planet wants to be clean, too.

No more poisoning.

These build up in cells over time, and childrens immune systems, particularly in the early years, have not developed to be able to cope with them. It is crucial you protect the public and the youth.

LET US STOP KILL
OURSELVES WITH OUR
FOOD.

Each day, countless
people are unknowingly
exposed to these harmful
toxins. For the sake of
ourselves, our children,
our future - please ban
them now! Be on the
right side of history, and
of Mother Earth. Thank
you.

Stop killing people with
your pesticides
Monsanto, DOW and so
many others! Stop!

Please, this MUST STOP!!

How can any person who has even a SMALL amount of compassion and humanity develop a product that could be toxic to any unintended being? I could not call that individual anything except a monster.

.....

tons of pesticides are sprayed on California soil each year. Science now has proof for the first time with the study done by Berkeley in partnership with farmworkers and their children, that this massive amount of chemicals affect childrens cognitive development because of drift and proximity to fields sprayed. The fields around elementary schools are sprayed up to twenty thousand pounds of chemicals during recess with no notification to the schools administration. How can this be allowed? Please regulate these chemicals. The farmers are victims as well because of the extremely high prise monetarily yet when it comes to OUR

663,000 litres of Foray
48b over west Auckland
2002- 2004 opened my
eyes to the harm even
organic pesticides can
do...

Janita	Boulton	jjkboulton@gmail.com	00610	
--------	---------	----------------------	-------	--

I think that pesticides will
be the death of us all,
which makes your job
one of the most
important in the nation.
Please recognize that we
are all connected, and we
are poisoning ourselves
when we use toxic
pesticides and herbicides.

In most cases we do not need to resort to chemicals to protect crops from disease and insect damage. Chemicals should be our last resort, especially neurotoxic organophosphate pesticides. It is clear that these harmful chemicals should be banned altogether. Thank you for listening. Sincerely, Jan Pappas Aiea, Hawaii

No plan B when we kill off this planet

Please start acting to protect the victims of these dangerous pesticides, not the companies that don't give a damn who they poison or how much suffering and environmental destruction they cause. I'm sick of your failure to act.

The chemicals are greatly affecting ALL living species especially the "friendly" insects which pollinate flowers. There is more harm exposed within our OPEN air and environment from these ongoing pesticides.

I support this petition as
a family physician and
public health advocate.

yes it is about time the
system stands up to
these chemical
companies and not ta
take the corruption that
they get paid for to allow
there dirty deeds

chemicals to be used in mass towards Americans. Whether this is in the form of agriculture, clothing, food, bedding, and home furnishing. It's shameful that Americas allowed and promoted for these toxins to be used as "safe" towards people. When I imagine the people who allowed for this toxic environment to exist or passed these toxins to be used for consumerist needs, must of had no soul or children. Poisoning Americans is beyond shameful, it's sick. All people deserve to know their resources are safe, and susitainable accessed. Big business needs create new jobs to obliterate this last wave of toxic production on consumer goods and agriculture. If there is any

Ban these pesticides and
leave a legacy for the
0 future generations.

We must stop using
pesticides before all the
people have cancer/other
health issues, and all our
bees and butterflies are
gone. When that happens
humans will soon be
gone also!

we must save the would
for are kids

It is truly frightening to think of the future of our earth if we are poisoning our children so that they are born with mental deficiencies or other chronic problems. Who will look after the next generation? The use of harmful chemicals in agriculture as well as for pest control in general has increased so much during my lifetime. It was not so much of a concern when I was young but usage began to rise when my children were teens. I personally have developed multiple chemical sensitivities and have been increasingly isolated because of this condition. I worry for the health of my children and their children's health.

I know, monoclonal agribusiness will not like this. Sorry.

The dumbing down of America shouldn't be blamed on teachers. Not only Fox News either. It is the lead and the 80,000 or so chemicals in our environment that are causing us to be less smart, to give us cancers and auto immune diseases, and to make this country become more violent, to give children cancers and ADHD.

"After years of delay", perhaps the Republican candidates are right to suggest the elimination of agencies that can't or won't do the work they are charged to do. Corporate profit should NOT be a consideration in any decision made by the EPA.

Instead of allowing chemicals to be freely introduced into the environment, it is time to require that their safety be established over years of testing instead of the present uncontrolled experiment on innocent people, especially our children.

What is the point of harming our children?

Please save our children and ban these.

Our water is getting contaminated with those pesticides and it is effecting our children.

So much damage to health has already been done. It's imperative for foods to be free of dangerous, health-robbing pesticides to contaminate foods and affect of our future generations and destroy their inherent potential by having serious health issues.

Organic agriculture renders these type of pesticides pointless, because organic plants are more robust, have better immune systems, thus don't even need crap like this to thrive. These destructive useless chem companies can't go bankrupt fast enough for my liking.

That something has yet to be done to prohibit known dangerous pesticides in an effort to protect our children and environment can only mean that one hand is washing the other and it's a "win-win" for both sides, while the rest of us pay a high price for this wanton negligence.

Please, please take this requested action under consideration.
Ban all pesticides! Ban all Herbicides! Poisoning mother earth results in poorer health for every living thing!

There is no distinction between a country that uses its military to poison its citizens and one who's government works complicitly with agribusiness to poison its citizens. Methods and motive notwithstanding, the results are the same. I have suffered with a limited life for years because of reactions to chemical exposure; from what are considered more mild things such as personal care and laundry products and especially pesticides, herbicides, etc. Please do the right thing to protect us and ban these poisons. Protect life and our Earth. Thank you.

We wonder why so many of our kids are born with these behavior disabilities, theres evidence that exposure to chemicals in the womb and infancy can cause diseases like schizophrenia in adulthood, ADD, ADHD, Autism, learning disabilities, psychological problems etc.

Admin McCarthy - Harm
cannot be undone.
Children look to adults
for protection. My wife
and I sacrificed our
retirement and our home
to rescue an neglected
and abused grandchild. If
we (adults collectively)
are not willing to stand
up to the forces of greed
in order to protect the
most vulnerable among
us, then we are derelict
in our duties. I am an
honors graduate of
Harvard, Yale, and
Georgetown. My wife is
equally educated. A child
is worth more than
personal wealth and
advancement -- they are
entrusted to us. Do your
duty to future
generations.

As a former teacher, this is very important to me.

It doesn't take a diploma to know you shouldn't drink bleach, or ingest fertilizer. What are you waiting for?

Pesticides have no place in our environment!!!

Nancy	Woodwell-Freedman	nancywoodwell@aol.com	06482	CT
Evelyn	Haas	oldleft@hotmail.com	19152	PA

In fact, there would be much less need to rely on these dangerous chemical products if proven best management practices were endorsed and recommended by the EPA.

This may directly affect me and my family, but I have no way of knowing which pesticides are being sprayed on the fields less than a mile from my house. I'm the mother of 3, the youngest of whom is still an infant. I'm deeply concerned about the use of these pesticides because of their potential detrimental neurological effects on my children. Most importantly, we need to take a proactive stance by discontinuing use of these pesticides, with the studies in mind, until long-term, combination use studies can be performed.

Agricultural and Environmental Sciences at the Smithsonian Inst., at the Smithsonian Science Information Exchange. This was a national governmental database on the collection and analysis of On-Going, Un-Published Research at all Federal and State supported levels. I was initially hired because of my collegiate and professional experience with pesticides, with an initial introduction to early IBM computers. In this capacity I was familiar with the dangers of pesticides, their uses and dangers, -- in spite of the claims made by the chemical companies. I strongly recommend your immediate attention and action to controlling these dangers with

It is past time to do this.

Having been diagnosed with a "neurological disorder of unknown etiology" that has left me disabled, this issue is of tremendous concern to me. My doctor told me that so many more neurological conditions are cropping up nowadays that don't fit into the usual categories, and they attribute them to "environmental causes" but don't know how to treat them. Scary stuff!

We need to get this crap out of our environment especially out of our food source !

enough already

Europe bans 1100 toxic chemicals, the US bans 11. Companies overseas need to prove that chemicals are safe for citizens. In the US, citizens need to prove that chemicals are not safe, wherein lies the problem!

Please move quickly to update your toxic substances requirements for the sake of our future.

Remember you are the last line of defense between our health, the health of our world and corporate destruction. This is a war, a war between education and ignorance, a war between choosing the right path or ignoring the right path. This is our time to find out, treat and prevent any future problems that will arise from greed, selfishness and corruption. Your actions of today shall be judged by those of tomorrow. People shouldn't have to suffer or die because corporations wanted to ignore the facts and earn more profits. We need your help, our world needs your help, please choose to do what's right and let's finish the fight.

United States shall guarantee to every state in this union a republican form of government, and shall protect each of them from invasion". This places the entire democratic party and all its members involved with use of position in governmental regulation with governmental control of life with legislation engaged in treason. The world can no longer stand the damage and destruction by any group club, religion or individual that promotes or tolerates murder, theft and extortion of another. Socialism, communism, talmudism and its two social parasitism scam scam creations judaism and islamism are illegal in any form in these United States of America.

Please regulate the use of these neurotoxins!

As a mother I am greatly concerned for this finding. Please let's do something for the sake of our children

Organic love

Please be responsible and help those who put their trust in you.

I am a farmer and know first hand the terrible impact these chemicals have on farmers and farm workers. Why do we think it is OK to poison the very people we depend upon to put safe food on our tables?

Pesticides contaminate the air we breathe and the water e drink. Please ban them forever!!

If we want to have healthy children and leave them and their children a world that is not poisoned and toxic, we look to you to ban pesticides and chemicals that poison our world.

We have known the toxicity of these highly dangerous and persistent chemicals for years now. It is time to protect our children!

It's NOT Just MY Children...but...YOURS Also...just sayin

Our little town is surrounded by crops sprayed with 'only God knows' how many toxic chemicals.....Do we need MORE? or the synergistic effects of one TOXIN mixed in spraying with another? I DON'T THINK SO!

Health concerns should take priority over industry profits.

One less thing to worry about and my grandsons, TY and Payson. They are 3 yrs. and just 03 months. Help me protect them!

As a biologist, I worked
for an environmental
biochemist for nearly a
decade. I know the
dangers toxic chemicals
have on the environment
and all the living
organisms that come in
contact with them. None
of my great grandparents
or grandparents died of
cancer. Then with my
parents generation, born
in the 30s, we started
seeing multiple cancers
starting in their
generation. We lost my
father , and two of his
sisters, and my brother
and cousins and uncles.
ENOUGH!!!! Please stop
this trend by removing
toxic chemicals from use.

Sarita	Vij	Vij.sarita@yahoo.con	110048	

As a retired chemist for the Federal Government, who worked in pesticide residue chemistry, I believe that sufficient data exists to support banning all organophosphate pesticides as safer pesticides are currently on the market to control the pest pressures previously controlled by the OP pesticides.

Bug-free food isn't necessary (plants will survive an amazing amount of chewing, if they're grown in nutrient- and humus-rich soil!) and the prettiest food in the world won't help a brain-damaged child. Poisoning the taxpayer and poisoning all of life spells inevitable doom for all.

I personally suffered from a pesticide overexposure from a perfectly legal pesticide. These substances are not safe, and the protections that are in place are woefully insufficient and ignored/not enforced.

STOP PASTICIDE!!!!!!
Stop the poisoning of people for profit.

0

The risks of these pesticides outweighs their potential benefits.

Emi	Ashida	eminator01@hotmail.com	94804	CA
Angela	Stuebben	Stuebben3@msn.com	08844	NJ
Amy	Wobig	amywobig7288@yahoo.com	55987	MN

~
 uses of these seven
 neurotoxic
 organophosphate
 pesticides immediately:
 chlorpyrifos-methyl,
 dicrotophos, dimethoate,
 ethoprop, profenofos,
 terbufos and tribufos.
 EPA should take
 immediate steps to ban
 these brain-damaging
 pesticides in order to: *
 Protect children from
 learning and memory
 impairments * Protect
 communities from
 pesticide poisonings
 when the pesticides drift
 off crops and into nearby
 neighborhoods and
 schools * Prevent
 contamination of drinking
 water with these
 pesticides * Prevent
 worker poisonings and
 harm to their children
 Action on these toxic
 chemicals is long
 overdue.
 If it kills pests it will kill us
 also just slower.

many fronts when it comes to addressing the complexities of all the companies that are using these toxic chemicals for profit, harming us and the environment from which we all depend and can we say the honey bees and other food crop pollinators for mankind as the very bright scientist Albert Einstein once proclaimed without the bees, mankind would cease to be or die in 4 years. Neurotoxics affect their tiny brains too and recently as the EPA and you are or should be well aware, the World Health Organization has labeled glyphosphates aka Ready-Round-Up and a host of others as known carcinogens but that has not stopped Monsanto trying to sue California from labeling them as

Pesticides are unnecessary if healthy soil biology exists. Dr. Elaine Ingham knows it, all farmers should too. Correcting mass farming practices to nourish soil life instead of killing it will require less work by farmers and result in healthier crops with higher crop yields... And reverse desertification

WE CANNOT HARM OUR
NATION'S CHILDREN FOR
THE SAKE OF PROFITS
FOR WEALTHY
INDIVIDUALS &
CORPORATIONS!

Exposure, and especially
involuntary exposure
(think in the womb), to
toxic chemicals should
not be tolerated. The
overall cost to society is
too great.
I know people who have
been harmed by these
pesticides.

We have known about the ramifications of pesticides since before the 1960's. It is passed time that we banned them. So do it now!

and killing every living being on this earth. We ask ourselves, why do humans and animals all have these strange diseases, and bees are dying, and the answer is, why not? Ask yourself, would you drink or eat anything that has been sprayed with pesticides knowingly? We have to protect our ecosystem. Each and every being has an important part in the health of our world, be it the sea, air and land. We have to protect, not destroy with the greed of man. Let's be the generation that begins the healing of our world and all that lives here. Thank you. Man did not weave the web of life - he is merely a strand in it. Whatever he does to the web, he does to himself." -Chief Seattle "The things

so...WHO are you going to test on when all the humans are COMPROMISED????

Surely there are other pesticides that can be used. The process of growing food should not be harmful! I grown my own without using those pesticides.

It's time that we admit that these chemicals are poisonous to people, it sickens me to know that these big corporations are allowed the harm not only the lives of people but the lives of other animals and insects as well. by continuing to turn a blind eye to the reality of this problem. we are making the planet uninhabitable and all for the sake of money.

Why are ANY of these pesticides approved at all?? We don't need these poisons applied to our food or in our environment. People can eat a few fruits and vegetables with minor spots. We are being POISONED by large agricultural firms. We've lost our frogs, bats, butterflies. We're losing our birds too. This has to stop somewhere. Your agency is Environmental Protection. Then why approve poisons?????

I think there are just too many unstudied chemicals circulating in our environment. I think it is time that the EPA begin to regulate them and ban ones that are dangerous or carcinogenic. Thanks for considering my comments.

Colborn's book about endocrine disruptors, and how important it is to understand how even micro-amounts of these chemicals can effect developing fetuses (in many animals, not just humans), it's been apparent that what ISN'T KNOWN about these- and many ag chemicals- requires a great deal more study. While I realize that industry is heavily invested in "what works" (for crop production), the broader negative effects of these chemicals can't simply be foisted off on the greater environment as a "necessary cost of doing successful farming"; but, if that IS the case, it's even MORE important that our government act to protect species- including humans- from

Consider the monetary cost as well as the damage these chemicals are doing to our future. If America is to remain strong we need to invest in our future by protecting our children. .

What is wrong with you people....so greedy....disgusting

If we support life;let people live without fear of pesticides that harm them and their children.

Clean air is a right, not a want. Clean air is a necessity, not a luxury. Clean air is life, dirty air is..... Every living thing on Earth depends on clean air to thrive and survive. And clean air is a necessity so that our waters and lands thrive and survive too. The EPA can and must be allowed to protect all of us. Our lives depend on it!

The time has been too long that nothing has been done Please get this done!!!

Protect the population

Long overdue!

I'm sure there's plenty of safe and effective alternatives to these dangerous poisons waiting to be discovered. If we can put a man on the Moon, it should be easy.

Enough is enough. STOP
the use of these toxic
chemicals!

Why would you even
consider harming another
human, most of all
children?

NOW!

Its time to take the
priority of corporate
profits and replace it with
the health of our
children.

It's time for you to
protect the public and
not the corporate bottom
lines.

Save the children
It is time to put a stop to
the chemical cocktails we
are continually exposed
to.

do it, do it now!

My elderly parents and I experience muscle problems, short term memory impairment, and mental confusion when the farm fields around us are being sprayed. Please protect the public, not the corporations.

If conclusive/empirical evidence exists showing damage related to this or these chemicals then there's no question about banning application.

Its time to realize that we have learned so much in the last fifty years. Its also time to acknowledge that we cease utilizing products like this. Lets stop the production and use of organophosphates, we are slowly killing our selves and our planet and we can do something about it.
