

online at <https://www.faa.gov/forms/index.cfm/go/document.information/documentID/1020386>. The completed application is sent to the district office that has jurisdiction over the area in which the applicant's home base of operation is located.

The information collected includes: Type of application, operator's name/DBA, telephone number, mailing address, physical address of the principal base of operations, chief pilot/designee name, airman certificate grade and number, and aircraft make/model and registration numbers to be used.

This information collection also includes safety mitigation plans; plans for operations over congested areas; and recordkeeping requirements.

Respondents: There are 1,763 active agricultural aircraft operators. Approximately 50 operators are certificated annually, and approximately 50 certificates are surrendered or revoked.

Frequency: New applications when needed; current 14 CFR part 137 certificate do not expire, but may need to be amended on occasion.

Estimated Average Burden per Response: The FAA anticipates 100 applications for new certificates, at 0.5 hours each; 100 applications for amendment, at 0.5 hours each; 100 petitions for exemption, at 0.5 hours each; and 350 submissions of plans for operations over congested areas, at 0.5 hours each. The total reporting burden is thus 650 responses and 325 hours.

All operators certificated under part 137 are required to maintain certain records for a minimum of 12 months. The FAA estimates this recordkeeping burden at 4.5 hours per operator. Assuming a universe of 1,763 operators, the annual recordkeeping burden is 7,934 hours.

Estimated Total Annual Burden: 325 reporting hours + 7,934 recordkeeping hours = 8,259 total hours.
