**Petition for Exemption for National United States Armed Forces Museum**

The National United States Armed Forces Museum in Houston, Texas (NUSAFM) advances knowledge and understanding of the U.S. Armed Forces by providing close contact experiences with historical military artifacts, and providing an immersive learning environment during museum tours and special events displays. The museum arranges, describes, and makes its collections accessible in support of scholarship, exhibitions, publications, and education. The museum harnesses the skills, experience, and dedication of American veterans to provide relief services in times of natural disaster by using museum assets both vehicles and aircraft and its members.

The NUSAF museum is fortunate to have over 200 volunteer members (including over 40 pilots and crew), who give their time, money, passion and expertise to the NUSAFM. Museum members restore, preserve, and operate a wide variety of military artifacts, vehicles, and aircraft.

Based on the above overview I support the museum request for relief from the FAA regulations (14 CFR Affected: sec. 91.9, 91.315, 91.319(a), 119.5(g) and 119.21(a) to the extent necessary to operate the museum's aircraft for the purpose of carrying passengers for compensation or hire for living history flight operations which will enhance the museum's ability to serve our community.

Sincerely,

Jana Williams

**Petition for Exemption for National United States Armed Forces Museum**

The National United States Armed Forces Museum in Houston, Texas (NUSAFM) advances knowledge and understanding of the U.S. Armed Forces by providing close contact experiences with historical military artifacts, and providing an immersive learning environment during museum tours and special events displays. The museum arranges, describes, and makes its collections accessible in support of scholarship, exhibitions, publications, and education. The museum harnesses the skills, experience, and dedication of American veterans to provide relief services in times of natural disaster by using museum assets both vehicles and aircraft and its members.

The NUSAF museum is fortunate to have over 200 volunteer members (including over 40 pilots and crew), who give their time, money, passion and expertise to the NUSAFM. Museum members restore, preserve, and operate a wide variety of military artifacts, vehicles, and aircraft.

Based on the above overview I support the museum request for relief from the FAA regulations (14 CFR Affected: sec. 91.9, 91.315, 91.319(a), 119.5(g) and 119.21(a) to the extent necessary to operate the museum's aircraft for the purpose of carrying passengers for compensation or hire for living history flight operations which will enhance the museum's ability to serve our community.

Sincerely,

David Tse
