RE: Aero Jet International DE PR, Inc. Letter of Intent to use relief provided in FAA Exemption No. 18510

To Whom it may concern,

Aero Jet International DE PR, Inc., (Q6JA227M) is formally submitting this Letter of Intent to exercise the relief provided by FAA Exemption No. 18510.

Aero Jet International DE PR, Inc. provides critical air transportation services for critically ill or injured individuals via aircraft for their safety and continued health care around the world. Like the rest of the industry, Aero Jet's operations have been significantly impacted by the COVID-19 pandemic. Aero Jet's training schedule has not been impacted by facility closures yet, however we anticipate challenges in the future and have received valid concerns from crew members regarding transportation to and from training facilities. The ability to utilize the relief provided by FAA Exemption No. 18510 will be beneficial for providing much needed flexibility in this extraordinary situation.

To ensure accurate tracking of any grace months extended through the exemption the Chief Pilot and Director of Operations will maintain detailed records of all associated pilot records by tracking the extensions in an excel spreadsheet and entering a record in the individual pilot training records noting the exemption. In addition, to mitigate the potential risk of extending those grace months beyond the exemptions, Aero Jet's Internal Audit Program will perform a monthly audit of all pilot records

Safety is Aero Jet's number one core value, and we maintain our commitment to safety and compliance during this unprecedented time. Please feel free to contact me at (954) 239-1409 or 541-784-5458 if you have any questions.

Op Spec A005 will need to be added with the listed exemption of 18510A

Respectfully,

Van Bishop

Director of Operations
