Recalls, Market Withdrawals, & Safety Alerts

 [Sign up to receive Recalls, Market Withdrawals and Safety Alerts](#)¹.

The list below provides information gathered from press releases and other public notices about certain recalls of FDA-regulated products.

- FDA works with industry and our state partners to publish press releases and other public notices about recalls that may potentially present a significant or serious risk to the consumer or user of the product. Not all recalls have press releases or are posted on this page.
- The posting of information on this page is separate from FDA's recall classification process. The weekly [Enforcement Report](#)² lists all recalls after they have been classified by FDA. For more information about FDA's product recall authority, process and classification guidelines, see [FDA 101: Product Recalls](#)³.
- For recall notices older than 60 days, see the [Recall and Safety Alerts Archive](#).⁴

Additional Resources

- [Major Product Recalls](#)⁵ - Expanded information about certain recalls due to the impact they may have on the public health, or for other reasons determined by the FDA
